# FORECAST SUMMARY

This Annual Report was prepared under contract No. C-8Y59 between the Turnpike Enterprise Finance Office of the Florida Department of Transportation (the Department) and URS Corporation. It satisfies the respective Bond Resolutions that require the Traffic Engineer to provide a traffic and earnings report to the Department on an annual basis. The report includes a comprehensive traffic and revenue analysis on the five toll roads and bridges owned by the Department and on the two toll roads and bridges operated by the Department, for the period July 1, 2011 through June 30, 2012 (FY 2012).

The Department-owned facilities include Alligator Alley (Everglades Parkway), Beachline East Expressway, Pinellas Bayway System, Sunshine Skyway Bridge and 95 Express. An analysis of traffic, revenue and expenses was completed for 95 Express through FY 2012. However, traffic, revenue and expense forecasts for this facility are not included herein. The facilities operated by the Department under Lease-Purchase Agreements and owned by the respective Authorities include the Garcon Point Bridge and Mid-Bay Bridge. An analysis of historic traffic, revenue and expenses was completed for the Garcon Point Bridge. However, traffic, revenue and expense forecasts for this facility are not included herein.

Prior estimates on the Department-owned facilities have been very reliable because traffic patterns are typically known and a significant amount of historical traffic and revenue data are already available. Forecasts were developed for four of the five Department-owned toll facilities with little uncertainty regarding land use and motorist travel patterns. The forecasts are based on actual traffic and revenue performance from FY 2002 through FY 2012, modified to account for historical and future growth in population for the relevant metropolitan areas. By applying the ratio between historical traffic and population growth to estimated annual population growth through 2020, an average annual traffic growth is obtained. This estimated growth rate is used as a general guideline in forecasting traffic growth on the facility. These forecasts are further adjusted for future known events such as roadway improvement projects, advancements in toll collection technology, development impacts and other noteworthy events. The forecast also includes additional revenues generated from the indexing of tolls on the Alligator Alley, Beachline East, Pinellas Bayway and Sunshine Skyway.

The Department-operated facilities have a similar amount of historical traffic and revenue data and established motorist travel patterns compared to Department-owned facilities. The forecasts for the Mid-Bay Bridge are based on actual traffic and revenue and are further adjusted for future known events.

URS Corporation will continue to monitor traffic and revenue conditions on these toll facilities, and update traffic and revenue estimates as conditions warrant. Improved methods of forecasting traffic and toll revenues will be employed based on the latest information on transportation, population and land use conditions in the vicinity of these toll roads and bridges.

# 9.1 OVERALL REVENUE RESULTS

The traffic and revenue forecasts contained in this section resulted from the analysis of four of the five Department-owned toll facilities and the Mid-Bay Bridge, which is one of the two Department-operated facilities. Each toll facility was presented separately in this report and the unique traffic and revenue factors that are relevant to each individual toll

facility were considered and analyzed. The following is a summary of the major factors that impacted the traffic and revenue forecasts of each facility:

#### **Alligator Alley**

Current revenue projections for all years of the forecast period were decreased due to the fact that traffic elasticity after the June 24, 2012 (FY 2012) toll rate increase is slightly higher than anticipated. Transactions in FY 2018 are expected to decrease slightly as a result of indexing. The calculated traffic growth rate guideline of 2.2 percent was used for the Alligator Alley traffic forecast through FY 2023.

## Beachline East Expressway

The current revenue projections for all years of the forecast period were decreased from the FY 2011 forecast due to two primary reasons. The first can be attributed to the fact that traffic at the new Dallas Main Plaza where the FDOT share of revenue is calculated is significantly lower than traffic at the Beachline Main Plaza. The second reason is due to FY 2012 actual revenues being lower than forecasted. The calculated traffic growth rate guide-line of 1.7 percent was used for the Beachline East Expressway traffic forecast through FY 2023.

# Pinellas Bayway System

The current revenue projections for FY 2013 through FY 2016 were decreased from the FY 2011 forecast due to higher than expected impact of construction activities from the SR 682 bridge replacement project. The revenue projections for FY 2017 through FY 2023 were increased due to the additional revenues to be generated from the indexing of tolls. Transactions in FY 2018 are expected to decrease slightly as a result of indexing. The calculated traffic growth rate guideline of less than 1.0 percent was used for the Pinellas Bayway System traffic forecast through FY 2023. The traffic and revenue forecasts account for a 10 percent SunPass discount for SunPass customers who do not participate in the Bayway Isle or General Public Pass programs. The standard 10 percent SunPass discount is offered when a threshold of 40 transactions per month is reached.

# Sunshine Skyway Bridge

Current revenue projections were decreased for all years of the forecast period due to the fact that FY 2012 actual revenues were lower than the FY 2011 forecast, and because traffic elasticity from the June 24, 2012 (FY 2012) toll increase is slightly higher than anticipated. Transactions in FY 2018 are expected to decrease slightly as a result of indexing. The calculated traffic growth rate guideline of 1.7 percent was used for the Sunshine Skyway Bridge traffic forecast through FY 2023. Additionally, a SunPass discount program is available to all SunPass customers. Drivers of two-axle vehicles with a SunPass transponder pay \$0.25 less than cash drivers. SunPass customers with three or more axles receive a 10 percent retroactive discount when they reach a threshold of 40 transactions a month. The SunPass discount program is accounted for in the traffic and revenue forecasts.

# Mid-Bay Bridge

Traffic and revenue forecasts correspond to the Authority's fiscal year (October 1 through September 30). Current revenue projections remained the same on the Mid-Bay Bridge for all years of the forecast period. The forecasts also assume that during the forecast period through FY 2023, there will be a gradual return to normal economic conditions, that the bridge will be expanded, and that the Mid-Bay Bridge Connector to SR 85 will be completed.

# **9.2 FORECAST SUMMARIES**

Estimated transactions for four of the five Department-owned facilities and the Mid-Bay Bridge for FY 2013 through FY 2023 are shown in **Table 9.1**. As previously mentioned, traffic, revenue and expense forecasts for 95 Express are not included herein. Total traffic transactions for the Department-owned facilities are expected to increase from 49.0 million in FY

2013 to 60.3 million in FY 2023, growing by approximately 2.1 percent annually. For the Mid-Bay Bridge, transactions are forecast to increase from approximately 6.8 million in FY 2013 to 12.8 million in FY 2023, an annual increase of 6.5 percent. As previously mentioned, traffic, revenue and expense forecasts for the Garcon Point Bridge are not included herein.

Overall, total transactions on the five facilities are expected to increase from 55.9 million in FY 2013 to 73.1 million in FY 2023, an increase of approximately 2.7 percent annually.

The gross toll revenue forecast by toll facility for the same period is presented in Table 9.2. Total gross

| 2022           | 38,210                           | 8,267                           | 5,007                        | 31,436                       | 82,920                         | 36,059                           | 118,979                        |
| 2023           | 39,611                           | 8,497                           | 5,084                        | 32,681                       | 85,873                         | 36,627                           | 122,500                        |

Note:

The forecasts include the impact of the SunPass discount program and future indexing of tolls. The 95 Express and Garcon Point Bridge gross toll revenue forecasts are not included herein. Mid-Bay Bridge revenue forecasts include the impacts of the opening of the Mid-bay Bridge Connector in January 2014 and the planned toll rate (1) increase in FY 2016.

toll revenue for the Department-owned facilities is estimated to increase from approximately \$55.4 million in FY 2013 to \$85.9 million in FY 2023, growing by approximately 4.5 percent annually. Total gross toll revenue for the Mid-Bay Bridge is estimated to increase from approximately \$16.1 million in FY 2013 to \$36.6 million in FY 2023, an annual increase of 8.7 percent. The forecasted annual increase in revenue is greater than the annual increase in traffic due to a planned toll rate increase on the facility and the opening of the Mid-Bay Bridge Connector. Overall, total gross toll revenue for the five facilities is expected to increase from \$71.5 million in FY 2013 to \$122.5 million in FY 2023, an increase of approximately 5.5 percent annually. **Table 9.3** shows the projected operating and routine maintenance expenses by toll facility from FY 2013 through FY 2023. Expenses that are periodic in nature are not included in this forecast; however, a periodic maintenance expense forecast is included in the individual chapters. Total operating and routine maintenance expenses for the Department-owned facilities increase from approximately \$18.5 million in FY 2013 to \$24.9 million in FY 2023. Total operating and routine maintenance expenses for the Mid-Bay Bridge increase from \$2.4 million in FY 2013 to \$3.4 million in FY 2023. Overall, total operating and routine maintenance expenses for the five facilities increase from \$20.9 million in FY 2013 to \$28.3 million in FY 2023, or 3.1 percent annually.

Notes: The 95 Express and Garcon Point Bridge operating and maintenance expense forecasts are not included herein.

Lastly, the net toll revenue forecast for each of the five toll facilities is presented in **Table 9.4**. Total net toll revenue for the Department-owned facilities in FY 2013 is \$36.9 million. Net toll revenues are estimated to increase to \$61.0 in FY 2023. The Mid-Bay Bridge shows estimated total net toll revenue of \$13.7 million in FY 2013 increasing to \$33.2 million in FY 2023. Overall, total net toll revenue for the five facilities is forecast to increase from \$50.5 million in FY 2013 to \$94.2 million in FY 2023, or 6.4 percent annually.
